Other requirements

• Note that privileges granted may be exercised only at the site(s) and/or setting(s) that have the appropriate equipment, license, beds, staff, and other support required to provide the services defined in this document. Site-specific services may be defined in hospital and/or department policy.

• This document is focused on defining the qualifications related to competency to exercise clinical privileges. The applicant must also adhere to any additional organizational, regulatory, or accreditation requirements that the organization is obligated to meet.

• Each specialty and/or supervising/collaborating physician is responsible for submitting a list of privileges, which are not otherwise identified in this document, and that are within the supervising physician’s normal course and scope of practice. This specific list will be approved by the Allied Health Professionals Council, the Credentials Committee and the Medical Executive Committee. An approved list will then be included in each application. If special duties, not included on the list, are requested they must be approved by the above committees.

• The privileges of a registered dietitian may be terminated at the direction of the clinical service chief in which the supervising/collaborating physician is a member or the Chief of Staff at any time for just and due cause. The supervising physician may appeal this termination to the Medical Executive Committee or a committee especially dedicated for this purpose. Privileges are voluntarily resigned upon leaving the employment of the supervising/collaborating physician(s).
