Lung Nodule Clinic

Early detection is key to beating lung cancer, and the Kettering Health Network’s Lung Nodule Clinic is committed to facilitating early detection. With quick result and physician communication our goal is to help you create personalized care plan for your patient.

85% of lung cancers detected early are managed with positive long term results.

We can evaluate and monitor your patients who may be at-risk for lung cancer.

Candidates include:

• Current or former smokers
• Patient with incidental lung nodules seen on chest x-ray or CT scan

To schedule a screening:

Phone (937) 395-8698 • Fax (937) 522-9275

Referrals can be sent in Epic to the Lung Nodule Clinic on the Ambulatory referral list.
