Kettering Health Network is changing the way we deliver surgical care. Perioperative Surgical Home and Enhanced Recovery After Surgery (PSH/ERAS) are patient-centered models for care coordination that focus on expectation management for patients, non-narcotic pain modalities, early feeding, and mobilization to help patients achieve the fastest functional recovery after major surgery.

PSH reduces readmissions and increases patient satisfaction by delivering enhanced clinical care before, during, and after a surgical procedure.

**PSH/ERAS Outcomes at Kettering Health Network**
- Decreased utilization of morphine equivalents per case by **61%***
- Decreased complications by **18%***
- Reduced length of stay **48%***
- Increased patient satisfaction scores by **29%***

*includes patients enrolled vs. patients not enrolled in PSH 2017-2019 YTD
**includes patients enrolled vs. patients not enrolled in PSH in 2018
